

Time	Speaker	Affiliation	Title
09:00			
09:15			
09:30			
09:45	Registration and Welcome (3.21, Berry lecture theatre)		
10:00			
10:15			
10:30			
10:45	Alex Corbett	University of Bristol	Convection on Temperate Sub-Neptunes
11:00	Ailsa Campbell	University of Bristol	Exploring the UV-Visible Transmission Spectrum of the Warm Super-Neptune HAT-P-26 b
11:15	Jay Fitzpatrick	University of Exeter	Studying supergranulation and granulation in stars other than the Sun with structure functions
11:30	Harry Baskett	University of Exeter	The effect of carbon to oxygen ratio on the structure and limb asymmetry in hot Jupiter atmospheres
11:45	Break (3.34)		
12:00	Charlotte Fairman	University of Bristol	Linking general circulation models and observed limb asymmetries in giant exoplanets with transmission strings.
12:15	Megan Mealing	Cardiff University	A population study of temperate planetary atmospheres with JWST and JexoPipe
12:30	Alessandro Salvatore Tramuto	University of Exeter	Photometric Variability Classification of Bright YSOs in the Carina Nebula with DECam
12:45	Berk Topcu	University of Bath	Studying the effect of spatial resolution on parameters near transients
13:00	Steve Ardern	University of Bath	RR Lyrae in the Large Magellanic Cloud: Period-Luminosity relation does not depend on metallicity
13:15	Lunch and Posters (3.34)		
13:30			
13:45			
14:00			
14:15	Darius Michienzi	University of Bristol	Illuminating the disc and corona: geometric models of the unobscured X-ray binary MAXI J1348-630
14:30	Soham Pravin Sanyashiv	University of Exeter	Be X-ray binary pulsar SXP 138: non-linear spin-down, pulse and spectral characteristics
14:45	Izaak Morris	Cardiff University	Electrical tuning of superconducting resonators at millimetre wavelengths
15:00	Michalina Maksymowicz-Maciata	University of Bristol	HI mass function from the largest sample of direct HI detections at $z > 0.2$
15:15	Huw Riley	Cardiff University	Dynamics of Milky Way Molecular Clouds
15:30	Break (3.34)		
15:45	Amira Dignah	Cardiff University	On the origin of star cluster formation: clues from the kinematics of the G23 molecular cloud.
16:00	Steven Ramnichal	University of Bath	Panchromatic modelling of resolved high-z galaxy observations using Bayesian Neural Networks
16:15	Joseph Hall	University of Bristol	Investigating the Impact of Selection Methods on Galaxy Cluster Scaling Relations
16:30	Sunaina Desai	Cardiff University	Cosmology from the cross-correlation of CMB lensing and galaxy shear
16:45	Discussion		
17:00			
17:15	Social Event; Drinks at The Robin Hood		
17:30			
17:45			
18:00			
18:15			
18:30			
18:45			
19:00			
19:15
